Vishnu Gopal P

Web developer

I am a B-tech graduate who possesses the knowledge and skills to develop end-to-end web applications. Although I have just graduated from college, I have had fair exposure to web development. I am very passionate about web development and am keen on user experience design. I am excited to pursue a role where I can grow my knowledge and skills while contributing to achieving organizational goals.

Internships

2017 - 2019
Poonchola Technologies, Kozhikode
Front-end developer

Did my front-end development course while in my academic time of B-tech. the intention was purely on my interest in web development. here, I have Worked effectively in fast-paced environments along with senior developers and helped them with all I can. Resulting me in improving my skills in the field.
Coded websites using HTML, CSS, JavaScript, and jQuery languages.
Adhered to SEO best practices while designing sites

2022-12 to - 2023- 05
Zoople Technologies, Ernakulam
full stack developer: Angular-Django

Soon after my academics ended, i made my next movement aiming to study the back-end of a web app development. I also did enhance my front-end web designing skill. I now am able to create a web app.Stayed current on developments in related Python frameworks. i have developed the skill to work independently to design, develop and test code. Studied the basics of angular for my framework since it is structured.

Projects

GYM related commercial site. (GYMRAT)

Fully responsive website.
Facilities like Add to cart, payment, etc.

Autism Detection.

A web app that helps in understanding autism in children.
This could be used in hospitals, clinics and by individuals.
